

### Sintal Agriculture completes 09/10 harvest campaign of technical crops

Sintal completed on technical crops harvesting campaign in both Kharkiv and Kherson regions. Harvest volumes of sunflower, soybeans and corn totaled 62,768 tones from 28,870ha. Sunflower volumes include 870 tons of high oil bearing sunseeds, market price of which is 9,000 UAH/t.

#### Technical crops: harvest results and price dynamics

Crop	Harvested land, ha	Yield, t/ha	Chg, yoy	Price EXW, UAH/t <sup>1</sup>	Chg, yoy
Sunflower	15,032	1.6	0%	4,060 <sup>2</sup>	73%
Soybean	8,436	1.9	2%	3,180	2%
Corn	5,402	4.2	-32%	1,441	46%

<sup>1</sup> APK-inform, average October 2010 price

<sup>2</sup> Market price for regular type of sunflower

Crop yields are on the level of the previous year for sunflower and soybean but below management's expectations as they were ruined on the back of droughts in late August, with corn being affected the most by abnormally high temperatures in late summer.

At the same time, prices for technical crops outgrew the decline in yields. Management believes that strong market trends should offset the decrease in production and positively support company's top-line.

---
